Large Company Resources
Small Company Responsiveness

iBASEt's Federal Division is founded on the principle of providing responsive, proven business (products and services) solutions for our Government Customers. Our mission is to assist our Customers in facilitating the fundamental and critical improvements to their business operations and infrastructure such that they are ideally positioned to achieve unequalled success in the marketplace.

Since iBASEt's inception in 1986, we have leveraged a highly-specialized and trained staff to successfully orchestrate a proven strategy of providing cutting-edge solutions to an array of complex issues.

We pride ourselves in having created lasting partnerships with our Customers and Team Members, the result of which has been a record of strong and continuous growth within a highly-volatile and competitive environment.

Our insight into and understanding of both our Commercial and Government Customers' requirements and existing business processes regularly translates into cost savings and performance efficiencies for them that are measurable in terms of reductions to personnel requirements, accelerated learning curves, improved quality of service, and modernization of both systems and processes through the effective use of leading-edge information technologies.

iBASEt's unparalleled expertise, combined with our comprehensive knowledge of our Clients' business infrastructure and the practical application of advanced information technology tools, techniques and methods, helps develop and implement the critical strategic and tactical maneuvers by which to achieve their corporate goals.
