iBASEt's Logistics Sector support includes the performance and management of functions relating to BRAC and to aviation logistics, supply and fiscal support.

We have leveraged our capability to design, develop and fabricate surrogate foreign military hardware systems in an effort to provide superior support to multiple DoD weapons test and training programs. Our Logistics Sector Team provides complete exercise support, as well as test and evaluation support, to ranges and test facilities across the country.

iBASEt also provides pastoral care to include Casualty Assistance Calls Officer (CACO) support, consultation, counseling, training and spiritual care..

iBASEt's Commercial product - Solumina® - is an Operations Process Management MES Software Suite designed to streamline enterprise processes by providing a paperless, integrated, organized and collaborative environment with systematic business processes designed for a multitude of complex industries. We invite you to visit www.Solumina.com for more details.
